

## Double Handled Burnisher

Item # 242004

Thanks for ordering our 242004 Double Handled Burnisher.

This tool is designed to be used primarily for flute headjoint fitting in conjunction with our 242003 Flute Head Fitting Mandrel.

Always be sure the surface of both the workpiece and the burnisher are free from dirt, oil and dust. Polish the burnisher to remove any defects. I use micromesh for this, (see page 48 of our 2006 catalog). You may also polish with Tripoli (110040), but be careful of heat buildup.
